MONA Bath Lift

Complete bath lift

MONA is a new bath lift from Horcher which offers optimum comfort thanks to the use of state-of-the-art Technology. With a soft, completely foam-covered lift bed it enables even patients who are sensitive to pressure and confined to bed to be moved and lifted by a carer. Getting from the bed to the bathtub is so much easier.

Integrated digital scales for the bath lift

Supplied with digital scales which can be integrated in the lift so that patient's weight can be measured and checked on the spot.

Simply move up to the bathtub,

lower by means of remote control,

then bath and lift with ease.
