COSY CHAIR

Mobile armchair and day-bed

The Horcher Cosy Chair combines the comfort of an armchair with the mobility of a wheelchair and the convenience of a luxurious day-bed. It is the ideal care and therapy chair whose main features include:

- › high level of comfort and safety;
- › strong, powder coated, steel frame;
- › best quality foams of different densities that provide perfect support;
- › top quality lambswool cover on both seat and footrest– great for those who suffer from decubitus breakdown, also easy to remove and washable in warm water;
- › easy access from either the side or the front of the chair;
- › the ideal position for each person– from sitting to lying and any place in between – without manual handling;
- › back and footrest is controlled by independent, easy to operate gas strut mechanisms;
- › easily maneuverable, on four 6 inch diameter, lockable castors

The Cosy Chair, with its bucket-like shape and sensitive, pressure relieving upholstery, can improve the quality of life of many elderly users - especially those with arthritis, Alzheimer's and Parkinson's. While users' lives are improved, caregivers also benefit from the additional time freed up by this versatile chair. Whether in the home environment, nursing home or hospital many care professionals consider the Cosy Chair as an essential aid.
